- Computer science and engineering

PERSONAL PROJECTS

Way2PG

Student accommodation website

Developed a user-friendly student accommodation website with a modern interface, search function, and booking options. Utilized responsive design principles for optimal accessibility. Gained valuable web development and project management experience.

Features

- Made this whole project using React and typescript for front end and Supabase for backend
- Its has authentication and based on JWT

GestureFlow

Gesture-Controlled Instagram Reels Scroller

Developed a custom computer vision and gesture recognition system to enhance user interaction with Instagram Reels. Implemented hand gestures to seamlessly scroll up and down through Reel content, providing a hands-free and immersive social media experience. Demonstrated innovative tech integration and creative problem-solving skills.
